<b>Introduction</b>	<b>3</b>
<b>1 Counting the real roots</b>	<b>5</b>
1.1 Sturm's theorem . . . . .	5
1.1.1 $P$ without multiple root . . . . .	5
1.1.2 $P$ with multiple roots . . . . .	6
1.1.3 A bound for the roots . . . . .	7
1.2 Real roots satisfying inequalities . . . . .	7
1.2.1 One inequality . . . . .	7
1.2.2 Several inequalities . . . . .	9
1.2.3 Deciding the existence of a solution of a system of polynomial equations and inequalities . . . . .	10
1.3 Systems with parameters . . . . .	10
1.3.1 Tarski-Seidenberg . . . . .	11
1.3.2 Systems with one equation . . . . .	12
1.3.3 Example: polynomial of degree 4 . . . . .	13
1.3.4 General systems . . . . .	16
1.4 Another method for counting real roots . . . . .	17
1.4.1 Hermite's method . . . . .	17
1.4.2 Determination of the signature . . . . .	19
1.4.3 Principal subresultant coefficients . . . . .	21
<b>2 Semialgebraic sets</b>	<b>25</b>
2.1 Stability properties . . . . .	25
2.1.1 Definition and first examples . . . . .	25
2.1.2 Consequences of Tarski-Seidenberg principle . . . . .	26
2.2 Semialgebraic functions . . . . .	29
2.2.1 Definition and first properties . . . . .	29
2.2.2 The Łojasiewicz inequality . . . . .	30

2.3	Decomposition of a semialgebraic set . . . . .	32
2.3.1	Cylindrical algebraic decomposition . . . . .	32
2.3.2	Construction of an adapted c.a.d. . . . .	34
2.3.3	The c.a.d. algorithm . . . . .	38
2.3.4	Connected components of semialgebraic sets . . . . .	40
<b>3</b>	<b>Triangulation of semialgebraic sets</b>	<b>41</b>
3.1	Thom's lemma . . . . .	43
3.1.1	For one variable . . . . .	43
3.1.2	For several variables . . . . .	44
3.1.3	The finiteness theorem . . . . .	48
3.2	Triangulation . . . . .	49
3.2.1	Simplicial complexes . . . . .	49
3.2.2	Triangulation of a compact semialgebraic set . . . . .	51
3.2.3	The curve selection lemma . . . . .	54
3.3	Dimension . . . . .	55
3.3.1	Dimension via c.a.d. . . . .	55
3.3.2	Dimension of algebraic sets . . . . .	57
<b>4</b>	<b>Families. Uniform bounds</b>	<b>61</b>
4.1	Semialgebraic triviality of families . . . . .	61
4.1.1	Hardt's theorem . . . . .	61
4.1.2	Local conic structure of semialgebraic sets . . . . .	63
4.1.3	Finiteness of the number of topological types . . . . .	64
4.2	Number of connected components . . . . .	65
4.2.1	Reduction to the case of a compact smooth hypersurface	67
4.2.2	The case of a compact smooth hypersurface . . . . .	68
4.2.3	Bound for the number of connected components of a semialgebraic set . . . . .	70
4.3	An application to lower bounds . . . . .	70
